

goSeed PRO TINUS™

Nutrient uptake for improved plant health.

Getting your horticultural crop off to a healthy start is critical to its long-term performance and yield potential. goSeed PRO TINUS is a unique seed technology, formulated to promote early seed nutrition, and is proven to increase early seedling development and root growth under a variety of growing conditions.

goSeed PRO TINUS enhances the natural process of growth, offering:

- Speed of emergence
- More vigorous seedlings
- Increased ability to cope with early season stress
- Increased yield potential

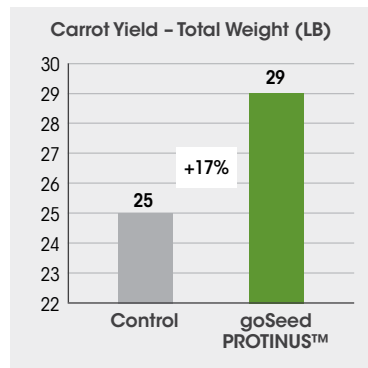

Figure 1 shows the yield benefit of goSeed PRO TINUS in carrots. In trials conducted in 2010, goSeed PRO TINUS outyielded the control by 17%.

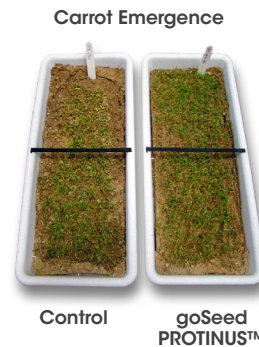

Figure 2 illustrates the positive impact that goSeed PRO TINUS has on seedling emergence. goSeed PRO TINUS results in greater overall emergence in carrots and more even seedling distribution.

goSeed PRO TINUS on Lettuce

Figure 3 highlights goSeed PRO TINUS as stronger, healthier looking seedlings against the untreated control.

goSeed PRO TINUS on Lettuce

Figure 4 illustrates the benefits of goSeed PRO TINUS on green romaine lettuce head development and maturity compared to the untreated control.

goSeed PRO TINUS is **available now** on the following vegetable seeds; Lettuce, Tomato, Carrots, Onions & Spinach.

goSeed PRO TINUS: We maximize Nature's potential.
